## Experience

### Forcepoint

TEL AVIV, ISRAEL

#### DevOps Engineer

Feb '21 – Jan '23

Participants of the DevOps Squad team aimed to accelerate digital transformations through DevOps Culture.

- Created the first ansible collection to decrease repetitive code in various playbooks.
- Engaged in a team as an engineer to transform CI/CD Jenkins jobs into GitHub Actions by applying the git branching strategy and using gitversion.
- Suggested various points for monitoring to keep attention on cloud resource utilization to save costs.
- Quickly troubleshoot and resolved network, hardware, software, and performance issues, including during rotating on-call emergency response shifts.
- Served as the technical focal point between the integration, R&D, support, and operations teams, demonstrating exceptional communication and coordination skills.

### Forcepoint

TEL AVIV, ISRAEL

#### Software development engineer in test

Feb '19 – Feb '21

Participants of the DevOps Squad team aimed to accelerate digital transformations through DevOps Culture.

- Collaborated with the automation team to design and develop automated test suites for the website using Java and Selenium and worked with large databases using SQL.
- Worked with management to resolve issues and report on the quality of system maintenance activity and new releases.
- Communicated directly with software developers, test engineers, product owners, business analysts, and project leaders.
- Served as the technical focal point between the integration, R&D, support, and operations teams, demonstrating exceptional communication and coordination skills.

### JL LTD

BNEI BRAK, ISRAEL

#### DevOps/QA and automation engineer

Jan '18 – Feb '21

Applied and use DevOps and Automation testing practices for crafting solutions in the Automotive Industry.

- Improved CI/CD Dashboard according to stakeholders' requirements to support 12000+ tests, 10+ branches, and several daily builds used by Devs, QAs, Managers, and SMEs, up to 100 persons in total.
- Monitored, supported, and supplied reports for bug tracking and defect resolution for a mobile-based product.
- Created and supported an automated framework and scripts using JavaScript and Node.js for new and emerging rich media and related products.
- Improved CI/CD process to use AWS instead of VMware vCloud for CI as PoC.

- Worked with domain experts and developers to create and execute test plans and worked closely with the development team, application support team, and Frontier help desk team to troubleshoot issues in production and development environments.

Inetex

REHOVOT, ISRAEL

**Software QA Manual and automation tester**

Dec '16 – Apr '18

- Tested web-based client-server applications and developed test plans and test cases for GUI.
- MConducted manual and automation testing according to test cases and tracked bugs with Bugzilla.
- Developed, maintained, improved, and executed Selenium testing scripts (Selenium Web Driver using Java and TestNG).
- Worked closely with software developers and other stakeholders in the software development process to ensure products met required quality standards.

DEC LTD

DONETSK, UKRAINE

**System administrator**

Sep '10 – Jun '14

- Provided company-wide desktop and remote help desk support to ensure continuous and efficient service for employees.
- Configured, installed, and maintained hardware and software equipment, including routers, switches, and network appliances.
- Kept up to date on relevant technology developments and upgraded operating systems as needed to stay competitive.
- Ensured network and IP connectivity and established uptime level agreements for all application servers and back-end infrastructure.
- Responsible for networking (Cisco, Juniper), server management (Linux, Windows, FreeBSD), user support, VoIP, ITIL implementation.

## Education

Tel-ran Educational Centre

REHOVOT, ISRAEL

**One-Year Course in Automation Quality Assurance**

2015 – 2016

Donetsk National Technical University

DONETSK, UKRAINE

**Bachelors degree in Telecommunication Engineering**

2003 – 2008

## Skills

**Versioning:** Git, GitHub, GitLab, BitBucket.

**CI/CD:** Jenkins, GitCI, GitHub Actions.

**Infarstructure as a code:** Ansible, Terraform, AWS CloudFormation, Nix.

**Ticket Tracking:** JIRA, Trello, PagerDuty.

**Containerization:** Docker, Kubernetes, AWS Elastic Container Service.

**Operating Systems:** Windows, RHEL, CENTOS 6/7/8, CloudLinux, Ubuntu/Debian, Archlinux, NixOS, MacOSX.

**AWS:** EC2, S3, RDS, Lambda, Kinesis, Cloud Watch, VPC, Route53, ELB, IAM, API Gateway.

**Programing Languages:** Python, NodeJS, Java.

**Scripting:** PowerShell, Bash, Groovy.

**Database Management:** MongoDB, Postgress, MySQL, ElasticSearch.

**Testing tools:** Selenium, Postman, Swagger, JMeter, Cucumber.

**Monitoring:** DataDog, Nagios, Kibana.

**Virtualisation:** VMware, Vbox, KVM.

## Natural languages:

Ukrainian (*mother tongue*), Russian (*mother tongue*), Hebrew (*full professional proficiency*), English (*full professional proficiency*).

## Interests

**Non-exhaustive and in alphabetical order:** Buddhism, Cooking, Horror movies, Music, Philosophy, Video games.
